

MA. LUISA ANDRIA R. CAGUIAT

COMPUTER ENGINEERING

0995 226 9784 | luisacaguiat@gmail.com | 312 Carmen Subd. Bambang, Bocaue, Bulacan

RELEVANT EXPERIENCE

Allied Care Experts (ACE) Malolos Doctors - Malolos, Bulacan June - August 2025

Intern

- Resolved hardware, software, and network issues to ensure stable daily operations
- Developed an employee ID system to improve data processing, ID generation, and distribution efficiency
- Supported system connectivity and internal technical operations

Municipality of Bocaue September - December 2024

Special Program for Employment of Student (SPES)

- Handled data encoding and Excel-based record management for accurate and organized databases
- Provided basic IT support including troubleshooting and system setup assistance
- Assisted in administrative and technical tasks to support smooth office operations

Institute of Computer Engineers of the Philippines Student Edition - BulSU Meneses Campus 2022-2026

Secretary (2025-2026), Multimedia Assistant (2024-2025) and Member (2022-2026)

- Managed documentation and reports to ensure compliance with requirements and standards
- Designed publication materials for organizational announcements and communication
- Developed workflow automation to enhance inter-team communication and improve task coordination

PROJECTS

Thesis: Solar-Powered IoT-Based Smart Net Enclosure System

- Integrated hardware and software IoT solution using sensors and microcontroller-based automation to monitor water levels and automatically deploy a net enclosure to prevent fish loss in aquaculture ponds.

Robocar

- Developed an Arduino-based autonomous vehicle integrated with sensors for real-time obstacle detection and programmed navigation logic enabling dynamic collision avoidance and path adjustment.

Involve PH

- Developed a municipal service web platform enabling citizens to submit reports and access local government services in a centralized system.

Discode

- Built a self-paced programming learning platform featuring structured lessons, instructional videos, quizzes, and an integrated coding environment for hands-on practice.

Attendance Monitoring System

- Designed a student attendance tracking system using ID-based verification per subject to automate attendance recording and improve academic monitoring efficiency.

EDUCATION

Bachelor of Science in Computer Engineering A.Y. 2022 – 2026

Bulacan State University - Meneses Campus

- President's Lister (2023-2025)

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, C#, C, JavaScript, MySQL

Web & Software Development: Web Development, Flutter, UI/UX Design, Figma, Visual Studio Code, Android Studio

Automation & IoT Systems: ESP32, Arduino Uno, Arduino IDE, IoT Development, Hardware-Software Integration, Troubleshooting & Debugging

CERTIFICATIONS

Industrial Cybersecurity Essential - Cisco Networking Academy 2025

Cyber Threat Management - Cisco Networking Academy 2025

Introduction to Cybersecurity - Cisco Networking Academy 2025

Video Surveillance System Certified Engineer - Dahua Technology Certification 2025

Cloud Management System Certified Engineer - Dahua Technology Certification 2025
